

Introducing Glacier

Rainhard Fuchs, CEO & Co-Founder

**At Glacier, we started
looking for the biggest
AI enablers for ESG teams
20 months ago...**

**“My fear that I will be replaced
by AI in two years' time is
coming true.”**

AI will create new opportunities, ESG teams must adapt

Old world

Project leaders / Impact specialists

10+ AI Co-Workers

Heavy prioritization and still too few
people to get most basic tasks done

Leveraging AI to free ESG resources
and achieve real progress

Our ESG agents solve customer pain points effectively: We develop expert AI agents, not chatbots

Non-AI
solutions

AI chats

Our solutions: AI agents

Our AI agents are capable of doing the heavy lifting required for expert tasks:

- Capable of advanced analytics and research
- Trained by experts for maximum quality
- Use-Case specific data as context
- The right company-specific data

GLACIER AI

Best quality, thanks to **ESG AI** trained by experts

CSRD reports write and improve

- Gap analysis of inventory report
- Composing data points
- Benchmarking with other CSRD reports
- Automated proofreading

Ecovadis Rating Automate and improve

- Fill out the questionnaire automatically
- Answers Assessment
- Concrete improvement roadmap

Customer enquiries about ESG automate

- Upload of individual customer questionnaires
- Automated responses
- Automated enquiries in the team

**Up to 80% efficiency gain
in compliant CSRD-
reporting with Glacier AI.**

Glacier AI achieves this by intelligent automation - here is how it works:

1 Context

- Identification of material datapoints
- Setup reporting structure, style, and language
- Screening contextual information (data & documents)

2 Generation & GAP Analysis

- Generation of datapoints
- Assess against ESRS requirements
- Provide GAPs and propose how to close those

3 Close GAPs

- Close GAPs based on Glacier AI's suggestions
- Provide additional context
- Iterate, if necessary
- Approve datapoints

4 Finalize Report

- Review & approve disclosure requirement text based on approved datapoints
- Adjust and iterate, if necessary
- Review & approve entire report

Strong feedback from the market

“This works like magic.”

PALFINGER

“My fear that I will be replaced by AI in two years' time is coming true.”

GRANT THORNTON

“This was exactly what we were looking for. We tried to develop it internally and failed.”

EVN

“We have cancelled the planned cooperation with our go-to consultant since our cooperation start. We are way better off with your solution.”

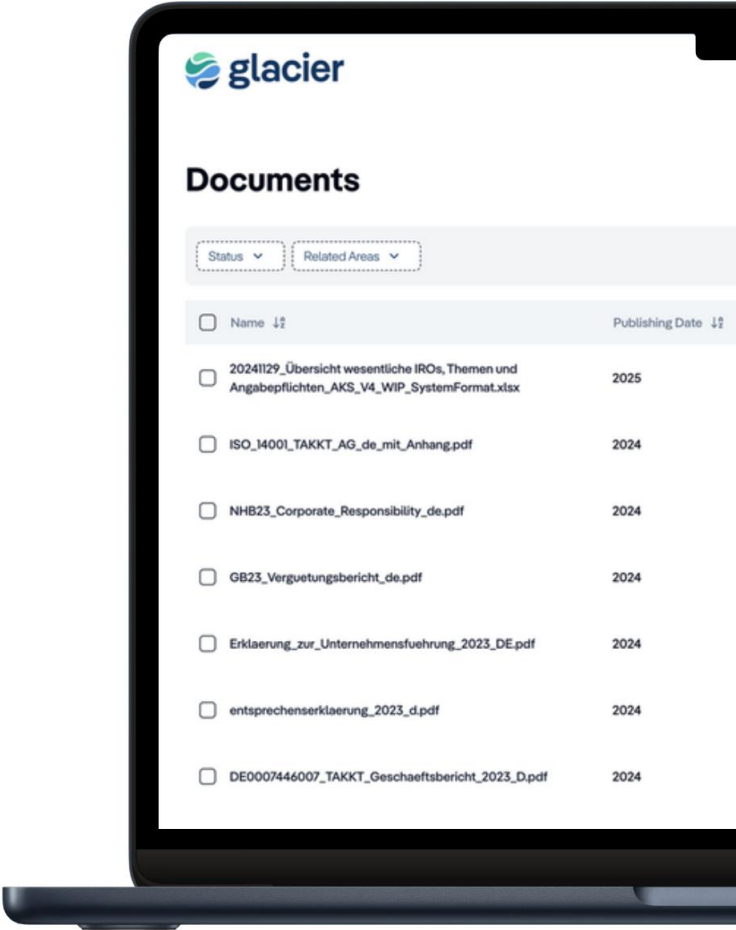

WELL-KNOWN GERMAN
MITTELSTAND COMPANY

“I'm scouting the market for, I would say three months now and I haven't seen anything so compliant and so fast like this one before. So this is really impressive and I think it helps a lot.”

GRUPO NABEIRO

“Wow, I'm glad Glacier exists, I have to say. I'm impressed and positively shocked.”

TECHNOALPIN

GLACIER TECHNICAL SETUP

Fulfil all the necessary requirements of corporate IT departments

Hosting in EU

Our software runs exclusively on servers in the EU. This means that no company data is processed on servers outside the EU.

Data security and privacy

All data provided will remain in your company's workspace and will NOT be used to train the model for other customers.

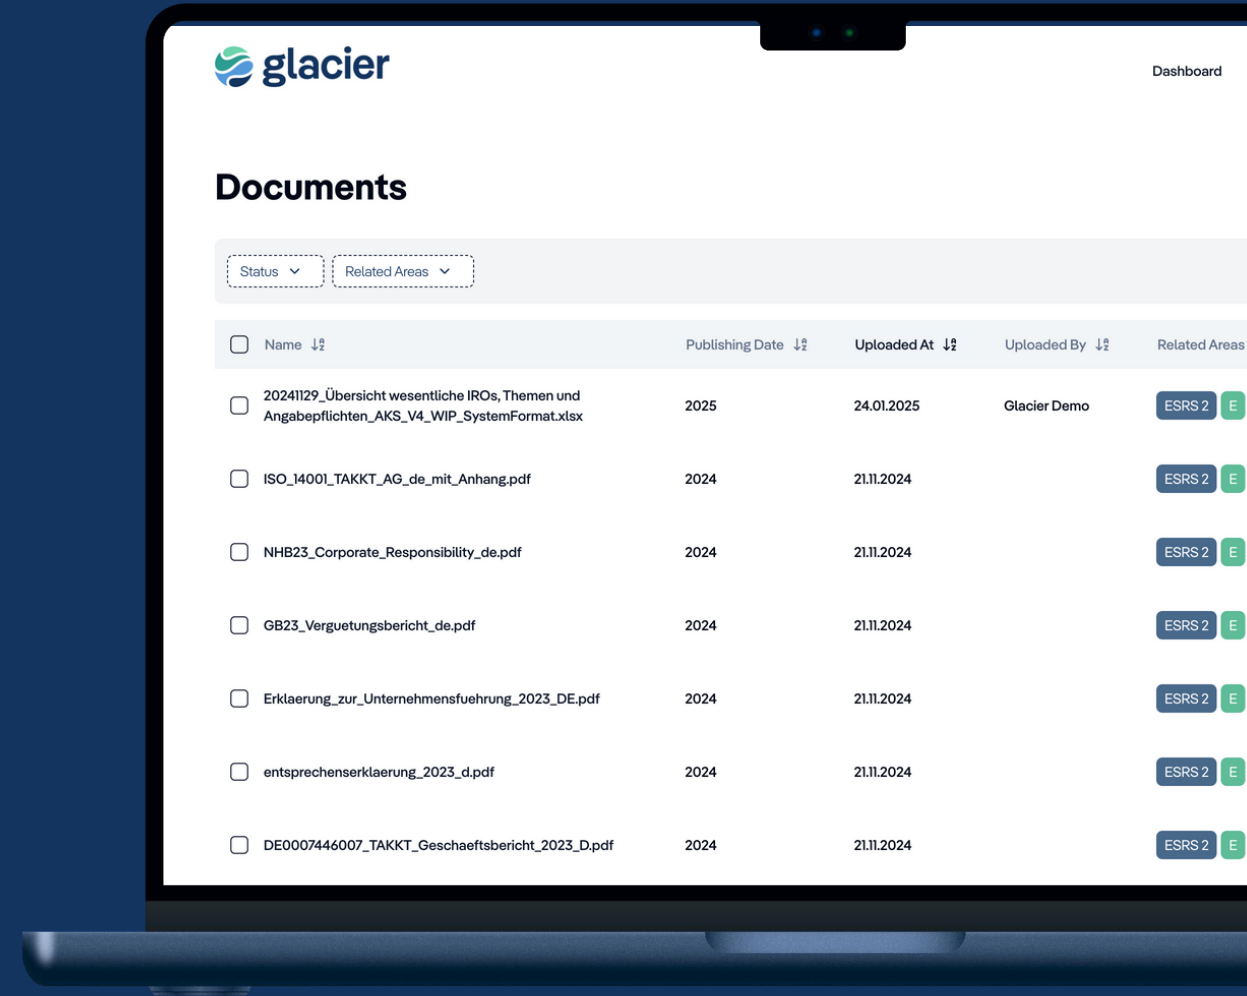

DSGVO compliant

We process your company's data on our platform in compliance with the GDPR and ensure that our application will also be compliant with future regulations.

WHERE MAGIC HAPPENS
